PROFESSIONAL SUMMARY

Computer Science and Engineering graduate (B.Sc.) now pursuing a Master in Applied Artificial Intelligence, while independently working on AI and machine learning projects. Specializing in AI, machine learning, and cybersecurity, and proficient in Python and Java, with hands-on experience building intelligent systems (AI prescription analysis using Tesseract OCR & spaCy NLP) and full-stack web applications. Eager to apply technical expertise in an innovation-driven organization.

SKILLS

Artificial Intelligence & Machine Learning: Model training, working with various AI/ML libraries, Data processing, NLP (spaCy), Tesseract OCR.

Cybersecurity & Penetration Testing: Practical experience in CTF (Capture The Flag) challenges, proficiency in TryHackMe and Hack The Box, Penetration Testing, Ethical Hacking, NFC Security Analysis.

Web Development: Proficient in Python, Java, JavaScript, HTML, and CSS (Backend and Frontend development).

Networking & Hardware: Basic network configuration, Cisco hardware setup, Network Security.

Operating Systems: Advanced proficiency in Linux.

Professional Strengths: IT Support, Leadership, Researching

PROJECTS

- **AI-Based Prescription Analysis:** Developed an automated system for extracting and mapping data from printed prescriptions using Tesseract OCR and custom-trained AI models with spaCy NLP.
- **Sentiment Analysis of Bangla and Banglish E-Commerce Reviews:** Designed and implemented a sentiment analysis system for E-commerce reviews using advanced Transformer-based models to process both Bangla and Banglish text.
- **Movie Recommendation System:** Built a personalized content suggestion engine using Python and machine learning libraries.
- **Arduino-based Weather Monitoring System:** Designed an IoT-based system to track and log environmental data.
- **Restaurant Billing System:** Developed an efficient billing application using x86 Assembly Language.

RESEARCH & ACADEMIC WORK

- **AI-Driven Cloud Security:** Conducted an in-depth academic study on integrating AI methodologies to enhance cloud security protocols and improve automated threat detection mechanisms.
- **NFC Security Analysis & Vulnerabilities:** Performed a comprehensive vulnerability assessment of NFC technology to identify potential security loopholes and risk factors.

EDUCATION

Master in Applied Artificial Intelligence
UNITAR International University, Malaysia
Expected Completion: 2027 | Currently pursuing

B.Sc. in Computer Science and Engineering
City University | 2022 – 2025

Higher Secondary Certificate (HSC)
Afajuddin Memorial College (Science) | 2020

LANGUAGE

Bangla: Native

English: Certified (B2 Upper Intermediate Level / IELTS Overall: 5.5, Speaking: 6.0, Writing: 6.0)
